Details

Pépinières Österreich (the french word Pépinière means tree nursery) was founded 1992 and is member of the european network and mobility program „Pépinères“. We offer residencies for european artists (designers and architects) in Graz and we also support and inform young artists interested in mobility and residency programs.

In the residency we want give space to projects focussed on and developed for Graz, based on architecture, architects should deal with the city's characteristics. Architecture in broadest sense: urbanistic themes, housing as well as city development, art in public space, gardens and parks, plays, workshops integrating architectonical subjects, interacting projects, discovering new locations ...

Pépinières Österreich is cooperating with **Haus der Architektur**/House of architecture Graz. This year Haus der Architektur initiates the first „Architektur Sommer“(june to august 2015). We propose our guest to present his/her project. in this frame

Summer of Architecture 2015

The Summer of Architecture 2015 project is intended to encourage an examination of our built environment. It provides an opportunity to discuss built architecture placements and to make them accessible from many different angles and by means of a wide range of approaches.

Another aspect is the fact that Graz and Styria boast a rich architectural legacy and an international renown as a city and province of architecture - from UNESCO world cultural heritage to the Graz School of Architecture and contemporary buildings in the region. The aim now is to discuss and reflect on this tradition.
